R 5 Recycling/reclamation of other inorganic materials.

13.1.3. PROPERTIES OF WASTE WHICH RENDER IT HAZARDOUS

This refractory product contains Chromium (III) oxide (Cr₂O₃). When heated, Chromium (III) oxide (Cr₂O₃) may change to Chromium (VI) trioxide (CrO₃). DHHS, EPA, WHO, and IARC have all recognized Chromium (VI) compounds as human carcinogens. Occupational exposure to Chromium (VI) compounds increases the risk of lung, nasal, and sinus cancer. Minimize dust generation to avoid exposure to Chromium (VI) and follow local hazardous waste regulations during the repair or demolition of the refractory lining.

Warning: When using this product, depending on temperature, atmosphere and the kind of binder, a reaction may occur with the formation of Chromium VI from the green chromium oxide (Cr₂O₃) present in the product.

13.2. POTENTIAL DANGER FROM THE WASTE:

Unknown at that date.

Before destruction and disposal of the refractory lining, customers are advised to evaluate any changes to the product that may be induced by the introduction of substances, or operating conditions outside the control of the Vendor
